AUTOMATED GRAVITY FEED DROP SEALER WITH BAG OPENER

**NEW DESIGN!
ALL-IN-ONE FRAME**

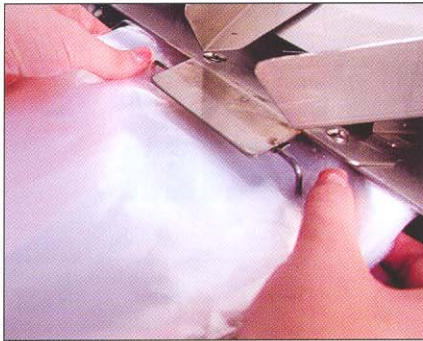

**Model
PP615/402-Combo**

*Rear Access
Door Opens For
Easy Storage.*

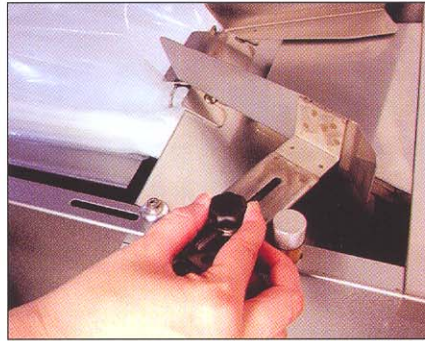

Combining the **Model PP615 Drop Sealer** and **Model PP402 Bag Opener** into one compact, portable unit. Operator simply loads a stack of bags into bag magazine on the Bag Opener, a self generating blower forces air into the bag for easy loading. Once filled, the bag is stripped forward and the next bag pops open. The operator simply allows the filled bag to slide down the Drop Sealer to a set of Holding Pins pre-adjusted for the bag length. A photo eye activates the Pneumatically Powered Seal Bar to close, sealing the bag. As the bag is sealed, a cutting bar strips away the excess material above the seal, the seal bar automatically opens and a jet of air clears away the scrap. The Holding Pins retract allowing the sealed package to slide off the machine then automatically return to the up position and the machine is ready for the next package.

EASY AS 1, 2, 3 ...

Load wicketed bags into machine.

Adjust side guide for package size and bag width.

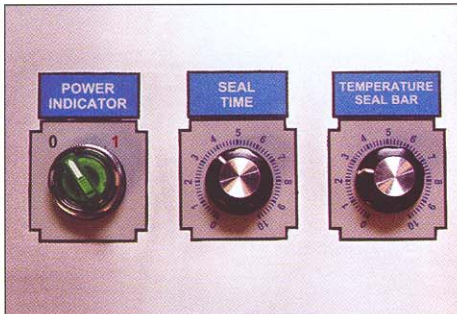

Load product into bag and push forward to tear bag from wicket
